- PLM Mobile solutions for all leading mobile OS like Android, IOS and Windows OS

Oracle Agile PLM Implementation Methodology

Oracle Agile PLM – A Case Study

Leading Network Equipment Manufacturer

Business Challenges

- Provide high quality products to the market
- Centralized Product record easily accessible by employees globally across all locations
- Improve product visibility across the company

Solution

Real time global visibility and access to product design data

- A team with dedicated employees were formed to implement the PLM initiative
- Selected Agile PLM as an enterprise wide PLM tool
- Agile PLM reduced several instances of design and manufacturing data held across the locations into a single , integrated repository for product development and manufacturing
- Agile PLM reduced the cycle time required for approval

Benefits

Rapid Implementation

Agile PLM successfully replaced several systems and streamlined business processes

Improved visibility

Agile PLM provided global visibility via a single worldwide PLM tool with improved collaboration and communication

Increased Efficiency

Agile PLM eliminated errors and rework caused by duplicate entry to achieve more paperless system

Lower Cycle Times

Agile PLM reduced total elapsed time to implement engineering changes from many days to a day- Reduced from **35 days to ~ 2 days**

Improved responsiveness

Agile PLM improved access response times by removing the need to store paper drawings
