DHRUV
Truly Transformative

EmVault

Archive, Purge, Restore - Organized Data Management

Product overview

➤ **Efficient data archiving**

➤ **Legacy data load reduction**

➤ **Improved performance and compliance**

EmVault

A specialized software solution for Opcenter data management that provides features to efficiently archive, purge and restore legacy and growing data, ensuring improved performance and compliance.

Business Challenges

Data Overload – Legacy and growing production data impacts efficiency and performance.

High TCO – High infrastructure and maintenance cost due to data volume.

Slow Processing – Delayed data processing impacts real-time business decisions.

No Support/Tool by product vendor – Increased cost due to customization of scripts to meet archival requirements.

Why EmVault?

Overcomes Key Business Challenges - Effectively addresses data management issues.

Configurable & Automated – Streamlines archiving, purging, and restoring processes.

Reliable Support–Backed by Dhruv's expertise and experience.

Seamless Integration – Acts as a central hub connecting all Opcenter instances.

Key Features

- **Automated Archive,Purge, Restore**
- **Supports Oracle/SQL DBs**
- **Connects to multiple PRD DBs**
- **Configurable rules for Archive, Purge, Restore**
- **Email Notification feature**

Key Takeaways

Improved performance and better data management

Lower TCO

Configurable, interactive, and easy to use

Meet compliance requirements
